Marked for murder in 1952 by Kikyu terrorists in the early days of the Mau Mau re-volt, Amalemba ignored their repeated threats and refused repeated tilled.

HE REFUSED to give up his friendships with Europeans and Asians in the city of Nairobi where he worked, first as a journalist and later as a mer-

chant.

Extremists, intent on creating an all-African state in Kenya, intensified their campaign against Amalemba when he was appointed Minister of Housing in 1958.

LABELED "traitor" by his extremest opponents, Amalemba devotes much of his time to building up Kenya's first multi-racial party, the

New Kenya Group.

As every American boy, old or young, knows - baseball is not the only national pastime. The sand-lot and the stadium have to wait when the grass is growing. By the time this young man is raising his own team, he'll be able to cut his lawn with an ultrasonic bladeless mower by remote control. He can just sit back and "coach" it around the vard by talking into a microphone!

While the electric industry is pioneering tomorrow's work-saving appliances, it is also continuing to lead the research to find new sources of electricity. And logically so. Electricity is our business.

In the future, you'll be hearing more from Edison about new ways of producing electricity from such things as nuclear energy, fuel cells, thermionic conversion and other developments in research.

Edison's promise is this: as new ideas in modern electric living come along, we'll continue to bring you the abundant, low cost electricity you'll need to enjoy them. THE NEW IDEAS IN LIVING ARE ALL-ELECTRIC
